Best Application	Premium merchandise, specialized branding	General use, broad distribution	Packaging lines, automated application	Windows, hard surfaces
Format Delivery	Individual/Sheet	Individual	Roll	Carrier Sheet

The Anatomy of a Manufacturing Quote

Diagnostic check: Do not assume fixed MOQ, lead time, certification, or shipping terms before final specification review.

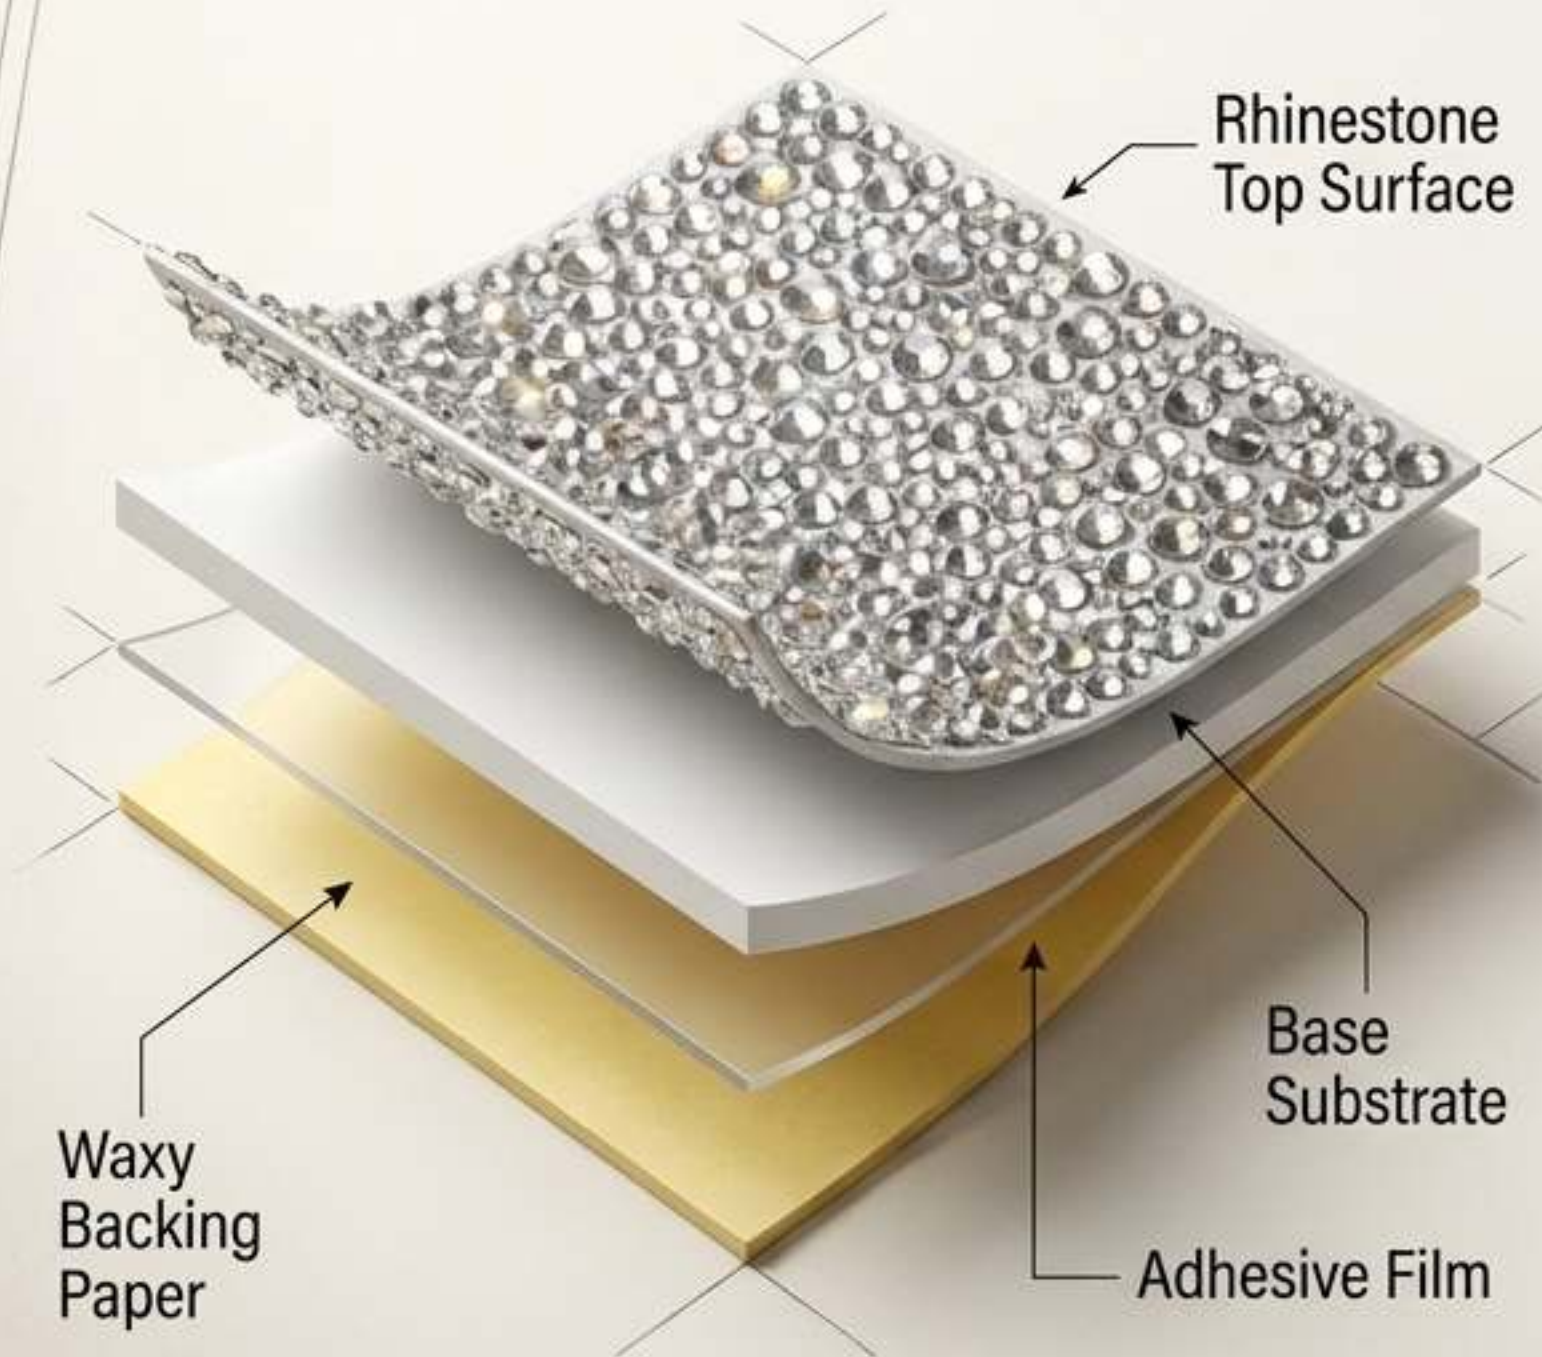

The Rule: Details depend entirely on final specifications and must be confirmed after artwork and quantity review.

The 7-Point Specification Blueprint

Defining the Physical Build

1. Size Target:

Exact dimensional constraints for the application surface.

2. Structure:

Base structural requirements for the sticker composition.

3. Material Direction:

The underlying substrate material choice.

4. Finish Preference:

Surface aesthetics (specifically the rhinestone texturing and light reflection properties).

Defining Execution & Logistics

5. Artwork File

High-resolution digital asset or distinct visual reference ready for production review.

6. Quantity Target

Estimated volume needs (noting that final MOQ relies on this target combined with physical specs).

7. Packing Needs

Delivery format requirements (e.g., individual bagging, bulk sheeting) which influence shipping terms and timeline.
