

Custom Wall Stickers: The Buyer's Blueprint

Category diagnostics, spec preparation, and RFQ requirements.

Start with the space.

Every specification decision begins with the real-world use case. Define the environment and how the item will be handled before defining the product.

Validating the Category Route

CURRENT FOCUS

Wall Stickers

Best for specific, large-format spatial applications.

Die Cut Stickers

Best for specific shapes/materials routed as individual handouts.

Roll Labels

Best for high-volume, rapid application production.

Transfer Stickers

Best for precise, background-free decal applications.

Compare use case, material, structure, print method, and application before locking the category.

Defining the Physical Specs

SURFACE FINISH

What is the visual and tactile preference (e.g., matte, gloss)?

2. CORE MATERIAL/ADHESIVE

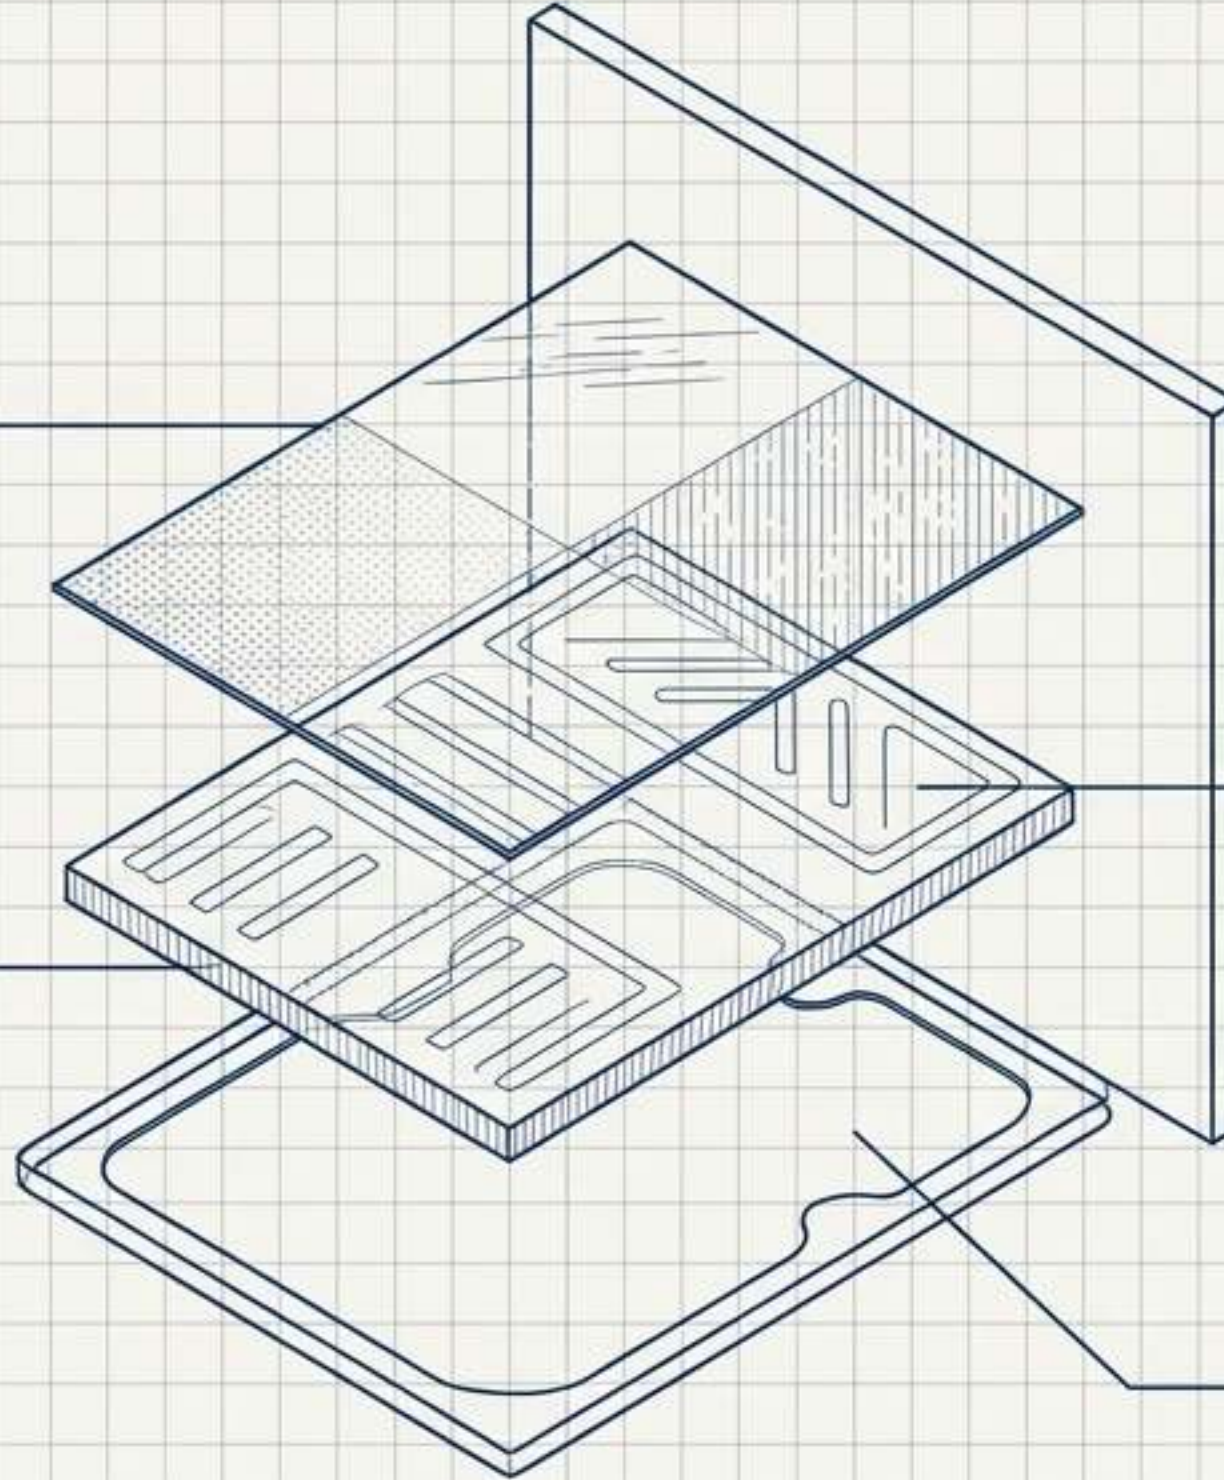

What is the visual and tactile preference (e.g., matte, gloss)?

MATERIAL DIRECTION

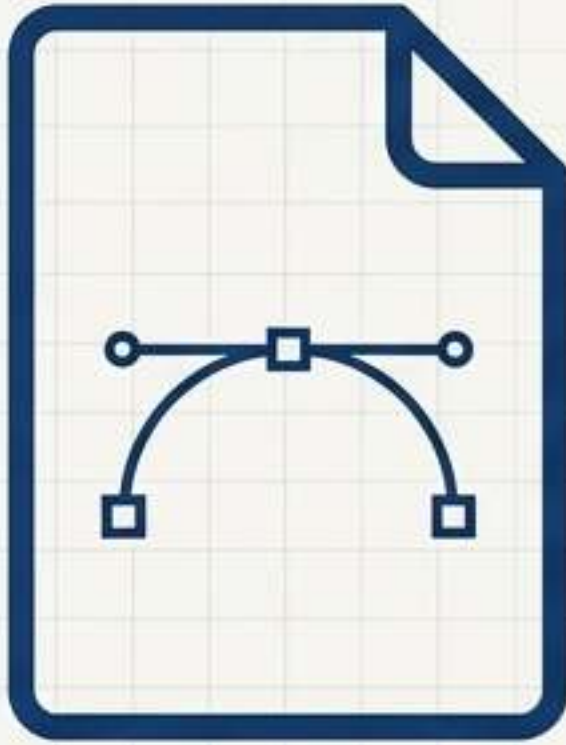

What is the base material requirement based on the specific wall texture and environment?

3. STRUCTURE & SIZE

What are the exact dimensional targets and structural cut requirements?

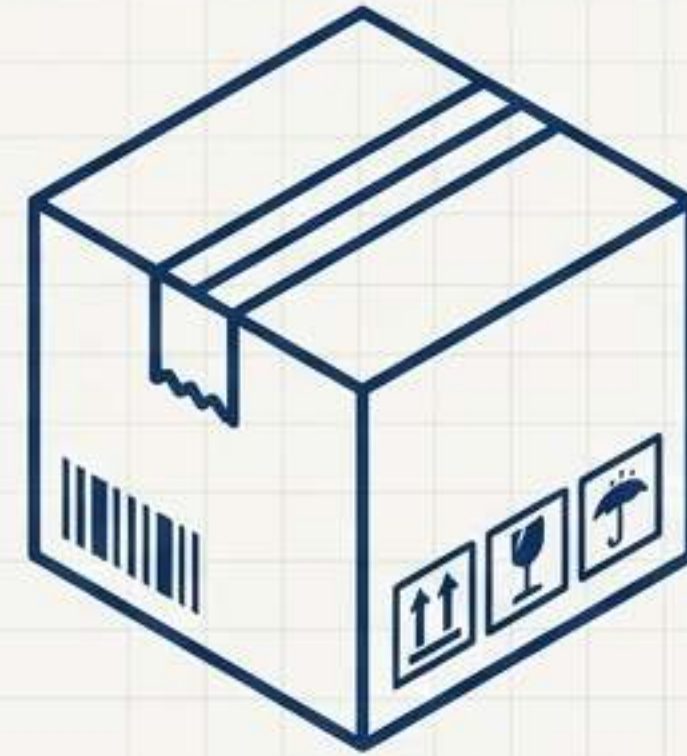

Operational Inputs: Beyond the Product

FILE & REFERENCE

Prepare the exact artwork file or a highly accurate visual reference. Production viability cannot be assessed without this.

TARGETS & NEEDS

Define the precise quantity target and specify any unique packing requirements for receiving and handling.

Navigating Production Assumptions

BUYER INPUTS

{ Use case, size,
material direction,
finish, artwork,
quantity, packing }

! SUPPLIER CONFIRMATIONS

Zigpac Confirms - Do Not Assume

[Fixed MOQs, strict lead
times, certification
statuses, shipping terms]

Rule: Production details depend entirely on final specifications.
They can only be confirmed after artwork and quantity review.

RFQ Pre-Flight Checklist

- ☐ 01: Real use case defined.
- ☐ 02: Size target confirmed.
- ☐ 03: Material direction chosen.
- ☐ 04: Surface finish preference selected.
- ☐ 05: Artwork file or reference prepared.
- ☐ 06: Quantity target estimated.
- ☐ 07: Packing route specified.
