Custom ID Hologram Overlay Specifications

Product Category: Transparent Holographic Self-Adhesive Film Sticker
Formal SKU: ZPCS0008
Publisher: ZIGPAC

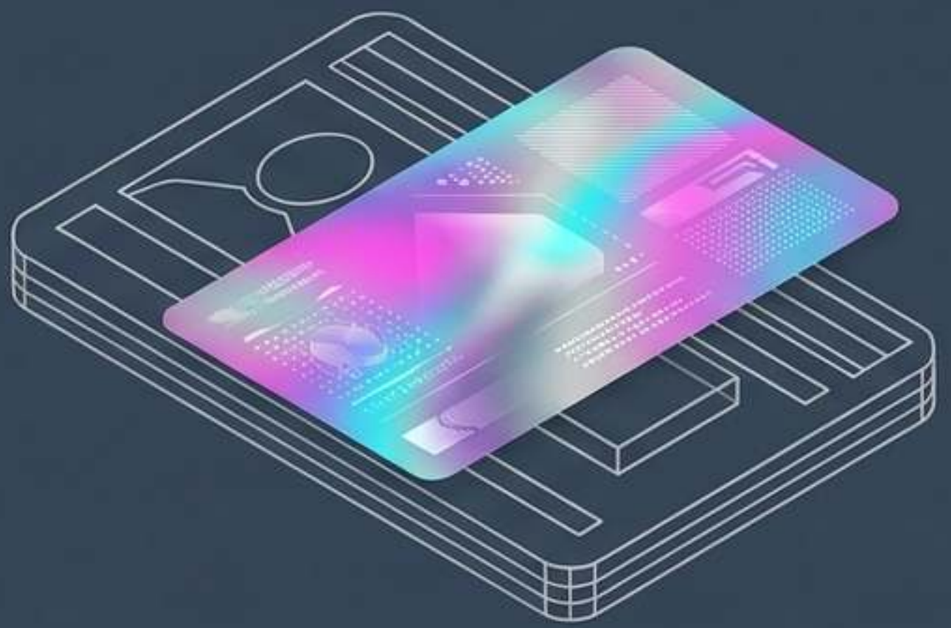

ZIGPAC

Unprotected documents present extreme vulnerability to counterfeiting

The Baseline Risk

Fraudulent modification of ID cards, driver's licenses, and security documents is an escalating operational threat.

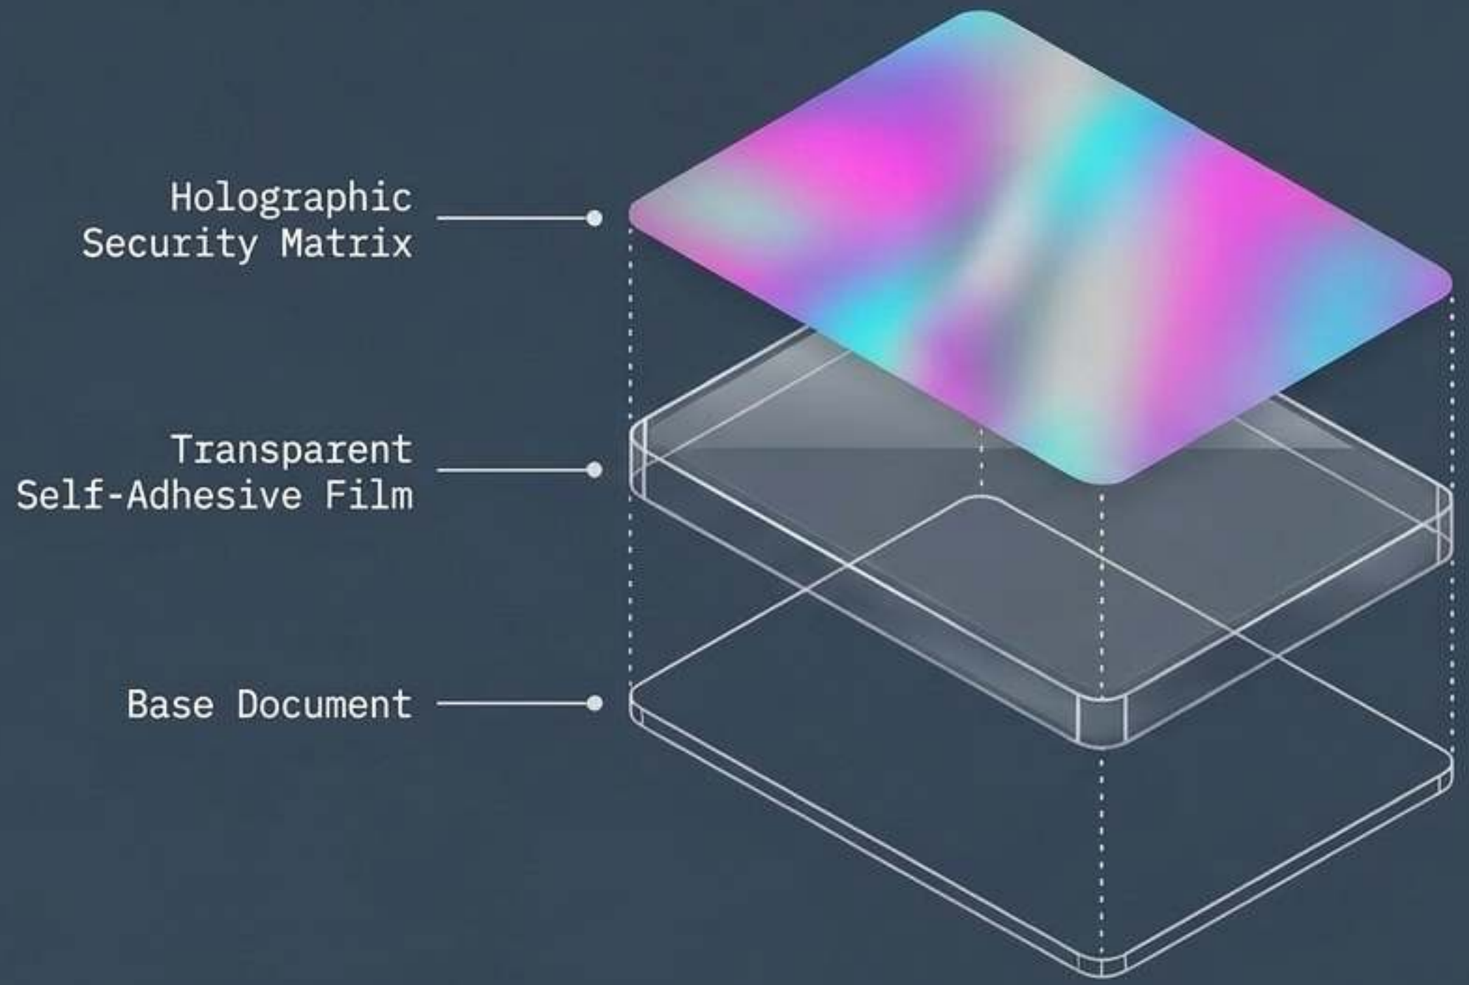

The ZPCS0008 Solution

A robust, tamper-evident holographic security layer that is exceptionally difficult to duplicate, shielding the underlying data from unauthorized physical alteration.

ZIGPAC

Anatomy of holographic document protection

- Designed to withstand everyday physical wear and tear.
- Provides a transparent, tamper-proof seal over sensitive printed data.
- Lowers long-term replacement and maintenance costs.

Security features adapt to specific operational requirements

Quadrant 1: UV Ink Effects

Integration of elements visible only under ultraviolet illumination.

Quadrant 2: Hot Stamping Foil

Precision-applied metallic foils for high-contrast security features.

Quadrant 3: Demetalized Effects

Intricate, laser-ablated negative space within metallic layers.

Quadrant 4: Advanced Die-Cutting

Contour cutting for complex, non-standard document shapes.

Customization parameters require project-specific feasibility review and quotation.

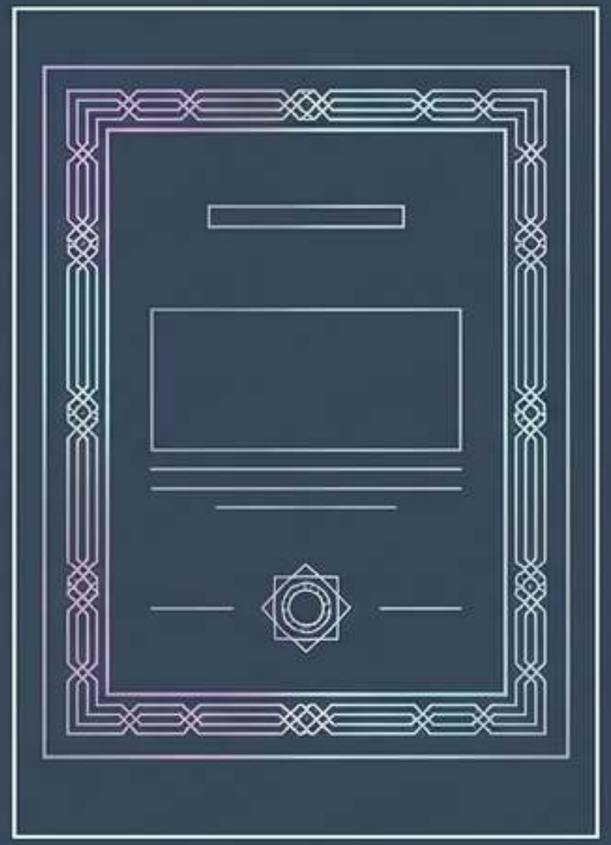

Standard deployment applications for ZPCS0008

Module 1:
Corporate &
Institutional ID Cards

Module 2:
Driver's Licenses

Module 3:
Security Documents
& Certificates

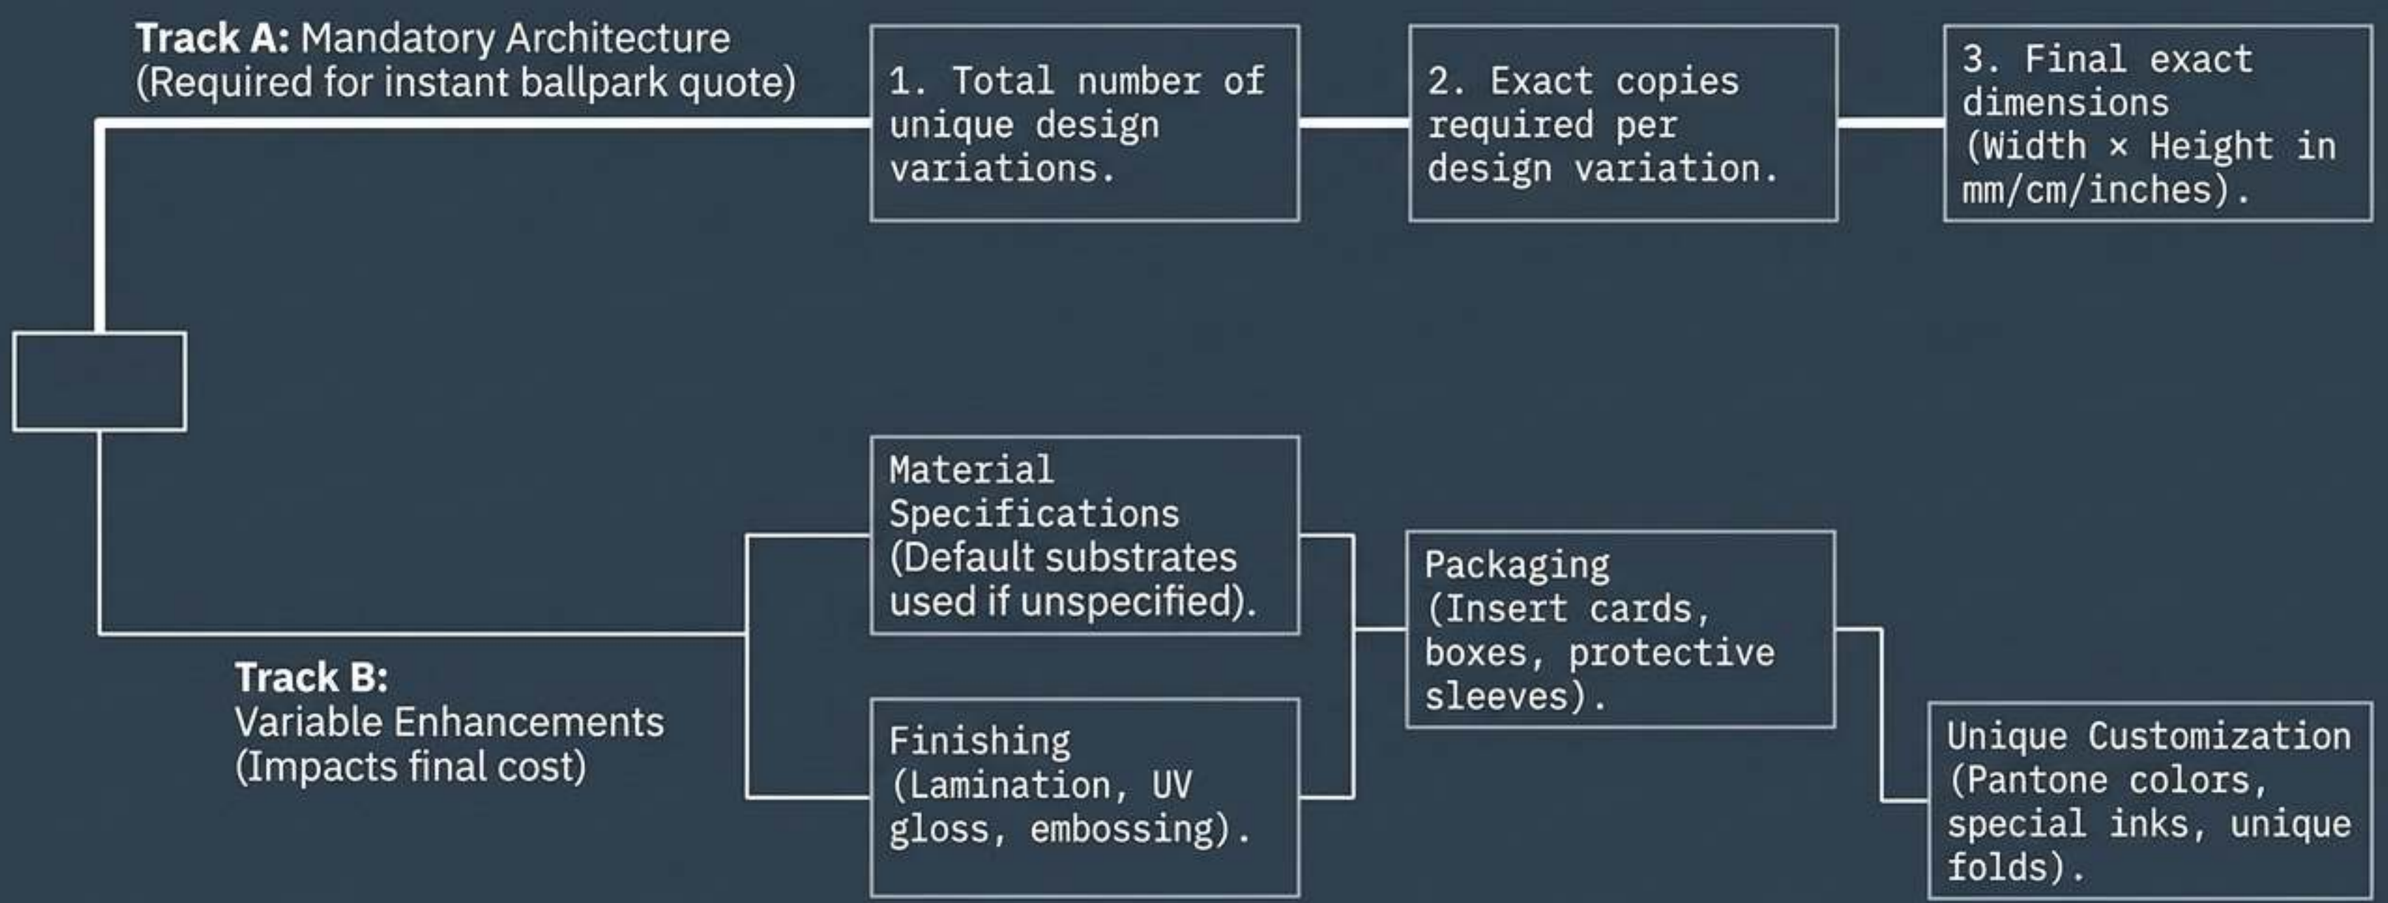

Module 4:
Passports &
Travel Visas

Logistical parameters scale based on project complexity

Ready-to-Order (Standard)	Custom Build
- **Minimum Order Quantity:** 50 units	- **Minimum Order Quantity:** 1000 units
- **Production Lead Time:** 1-3 business days (for in-stock items)	- **Production Lead Time:** 7-10 business days (Rush option: 3 business days subject to volume)
- **Sample Acquisition:** $80 USD per piece (Ships within 2 days of payment)	- **Sample Acquisition:** $200+ USD based on complexity (Quote required)

Procurement Note: Values represent standard baselines. Final MOQs, lead times, and shipping durations are subject to final project-specific confirmation. Reference the Shipping & Delivery Page for transit estimates.

The ZPCS0008 Quotation Engine

ZIGPAC

The ZIGPAC project readiness checklist

Step 1: Define Architecture.

Determine if the project utilizes a Ready-to-Order standard model (50 MOQ) or requires Custom capabilities (1000 MOQ).

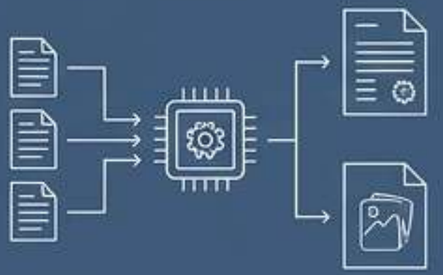

Step 2: Prepare Specifications.

Compile exact dimensions, required quantities, and map out any necessary secondary features (UV, Foil, Demetalized).

Step 3: Initiate Quotation.

Submit mandatory data points (Designs + Quantities + Sizes) to Zigpac to generate accurate baseline pricing and initiate sample production.

Pro Tip:

Standard samples are ideal for rapid quality verification before committing to custom tooling.

ZIGPAC

Compliance and legal mandates

Legitimate Use Only: All ZPCS0008 products are engineered strictly for legitimate security enhancement and brand customization.

Purchaser Liability: The purchasing entity bears sole responsibility for ensuring full compliance with all applicable local, federal, and international laws and regulations.

Zero Tolerance Policy: These overlays are not designed, nor intended, for counterfeiting activities. ZIGPAC actively cooperates with law enforcement agencies regarding any fraudulent use attempts.
